The Beginning of the End of Adobe Flash Player

By Jared Newman, PCWorld Nov 9, 2011 2:10 PM

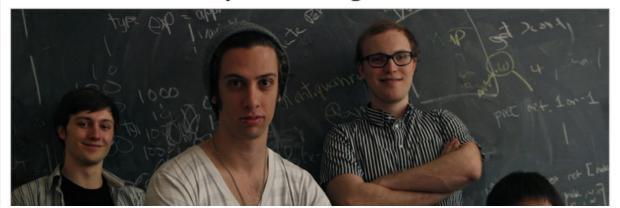

Adobe is trying to put a positive spin on the news that the company is stopping development on mobile Flash Player. From now on, Adobe will focus on HTML5 and AIR-based native apps for smartphones, while pushing forward with Flash Player on PCs.

"We are super excited about the next generations of HTML5 and Flash," Adobe's Danny Winokur wrote. "...There is already amazing work being done that is pushing the newest boundaries, and we can't wait to see what is still yet to come!"

Rails

Rails

- Convention over Configuration (CoC)
- Utiliza a linguagem Ruby
- Criado por David Heinemeier Hansson (37signals)
- Model-View-Controller (MVC)
- Don't Repeat Yourself (DRY)
- meta-framework (ActiveRecord, ActionMailer, ActionPack, ActiveModel, ActiveSupport)

Ruby

Ruby

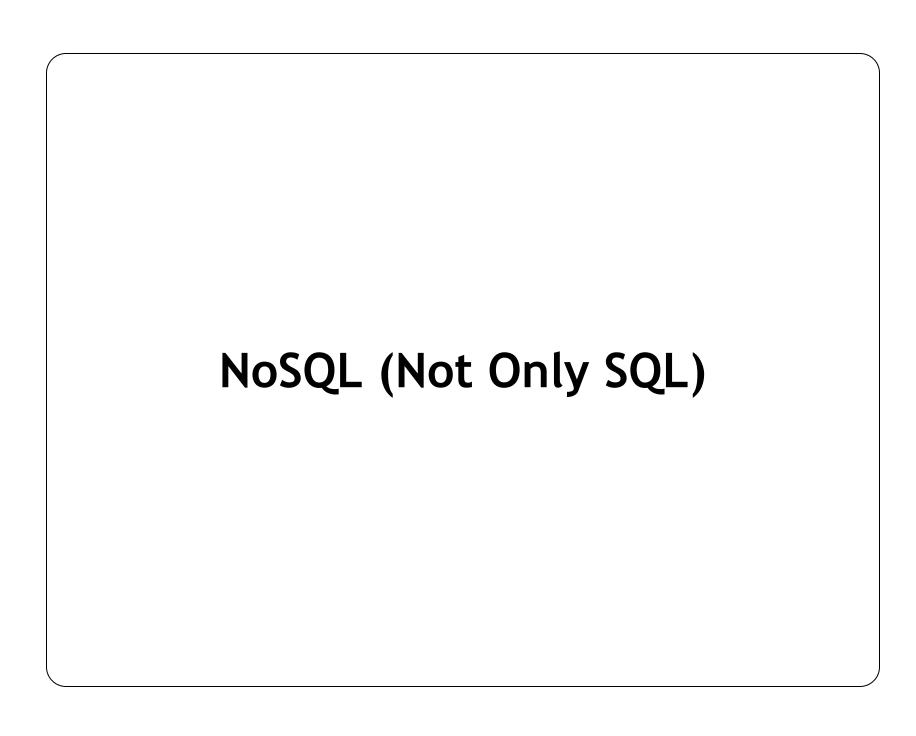

- Linguagem orientada a objetos com tipagem dinâmica
- Algumas características de programação funcional (high order functions)
- Mixins (inclusão de módulos para simular herança múltipla)
- Duck Typing
- Meta-programação

Ruby

```
1.day.from now
 2
       => Thu, 10 May 2012 15:32:53 UTC +00:00
 3
       1.day.from now
       => Thu, 10 May 2012 15:32:57 UTC +00:00
 4
 5
       1.year.ago
 6
       => Mon, 09 May 2011 15:33:00 UTC +00:00
       10.years.from now
        => Mon, 09 May 2022 15:33:07 UTC +00:00
 8
 9
       10.years.from_now > 9.years.from_now
10
        => true
11
12
        ("a".."f").to a.shuffle
13
        => ["b", "c", "e", "f", "d", "a"]
14
15
16
       require 'prime'
       => true
17
18
       Prime.take(10)
19
        => [2, 3, 5, 7, 11, 13, 17, 19, 23, 29]
```

Bancos de dados relacionais não escalam bem em aplicações web!!!

NoSQL (Not Only SQL)

- · Orientado a documentos
- Documentos são objetos JSON armazenados em formato binário
- Mapeamento em memória (limitado em sistemas de 32bits tamanho máximo do banco aprox. 2GB)
- Sharding e Replicação

Pontos fracos / Limitações da Web

por John Ousterhout no curso WebApplications da Stanford University:

- Divisão cliente/servidor
- Complicada, desorganizada (muitas linguagens, tecnologias)
- incompleta ("not enough building blocks")
- "HTML é similar a uma linguagem Assembler" (baixo nível)
- problemas de segurança (um pequeno erro pode deixar todo seu sistema vulnerável)

Futuro da Web!?
